

Description

Assembly made with the max line of pedestals (14 kg) and rods, for modular isolation, allows the disassembly and can have several flags (tarpaulins) with different information for the same support, the tarpaulins have a Velcro for closing, which allows their easy replacement. It has handles for movement.

Application

Utilized with a heavy informative easel, it can be used outdoors in harsh weather conditions (withstands exposure to strong winds for example).

Differentials

It may be used in any type of weather and floors, high resistance, since the pedestals have bases made in one piece, without a cover at the bottom, which does not allow the leakage of concrete residues which fill the base, or promote scratches to the floor, with rivets and screws at the base. The great advantage is the possibility of purchasing one single support and a set of flags (tarpaulins) with various information tailored to the needs of the customers, for example, for promotional actions with different themes on each day of the week.
