

Description

Pedestal made of high-durability plastic material (base - PE, body - PVC, cover - CP) with concrete-filled base and metal hooks for mounting of chains or isolation bars and transportation handle according to ergonomic and safety rules

Application

Signaling, people and vehicle flow guidance, isolation and demarcation of areas in indoor and outdoor environments, in any kinds of floor.

(for the solar power assembly, sun exposure is required)

Differentials

Single-piece base (without a cover at the bottom), weather resistant, stainless, high durability, allows a distance of up to 4 meters between parts, for utilization with chains.

No wires or battery recharges are required.

TOTAL AUTONOMY OF THE FLASHING ASSEMBLY

Flashing Assembly

Bayer polycarbonate lens, 4 high-brightness LEDs (360-degree view), SCHOTT (German) power pickup plate, and 800mAh battery with estimated life of over 3 years.

As for operation after 8 hours of sun exposure, we will have a full recharge for a period of approximately 54 hours flashing, the assembly has a light sensor which turns the LEDs on and off according to the ambient lighting (starts flashing in the late afternoon and automatically shuts off at dawn).

**Weight
14Kg**
